

Zero Waste 101 Workshop • July 14, 2016

U.S.

zerowaste

BUSINESS COUNCIL

Cut trash costs and generate more recycling revenues
Find out why businesses are embracing sustainability
Learn how to become a Zero Waste Business

- **Kick start your Zero Waste Program**
- **Go Zero Waste without breaking the bank**
- **Understand and EXCEED new state mandates (AB341, AB1826)**

What is Zero Waste? Is it possible? How do I get started? Does it cost money?

USZWBC proudly presents this affordable introductory workshop that provides the basics for businesses that are just starting their recycling program or want to take it to the next level.

Our experts will show attendees the importance of measuring what is wasted, and tracking reuse, recycling and composting programs. Learn how to plan for more waste diversion. Find out how businesses have decreased waste bills dramatically by diverting over 90% from landfills, incineration and the environment. This workshop is appropriate for both small and large businesses alike.

The workshop will also include a presentation on waste reduction resources CalRecycle has available for businesses and will be followed by a tour of a nearby anaerobic digester.

Instructor: Sue Beets-Atkinson, USZWBC Board President
